

LIST of PUBLICATIONS – Prof. Noam Adir

1. Probing for the Interactions of the 32 kDa-Q_B Protein with its Environment by use of Bifunctional Cross-Linking Reagents; **N. Adir** and I. Ohad; *Biochimica et Biophysica Acta – Bioenergetics* 850, 264-274 **(1986)**.
2. The Effect of Cross-linking on the Native and Denatured 32-kDa-Q_B Protein of *Chlamydomonas reinhardtii* Thylakoids; **N. Adir** and I. Ohad; in: *Regulation of Chloroplast Differentiation* (G. Akoyunoglou and H. Senger, eds.) Alan R. Liss, Inc. pp. 615-620 **(1986)**.
3. Interaction of the Q_B Protein of Various Species with Cross-linking Reagents and their use for its Isolation; **N. Adir**, J. Hirschberg and I. Ohad; in: *Progress in Photosynthesis Research* (J. Biggins ed.) Vol. III, pp. 791-794, Martinus Nijhoff, Boston, **(1987)**.
4. The Synergistic Effect of Light and Heat Stress on the Inactivation of Photosystem II. G. Schuster, S. Shochat, **N. Adir**, D. Even, D. Ish-Shalom, B. Grimm, K. Kloppstech and I. Ohad. in: *Plant Membranes, Structure, Assembly and Function* (J. L. Harwood and T.J. Walton, eds.), pp.133-138, London: *The Biochemical Society* **(1988)**.
5. Structural Properties of the D1 and Surrounding Photosystem II Polypeptides as Revealed by their Interactions with Cross-Linking Reagents; **N. Adir** and I. Ohad; *Journal of Biological Chemistry* 263, 283-289 **(1988)**.
6. Inactivation of Photosystem II and Turnover of the D1 Protein by Light and Heat Stresses; G. Schuster, S. Shochat, **N. Adir**, and I. Ohad; in: *Techniques and New Developments in Photosynthesis Research*, (J. Barber and R. Malkin, eds.), pp. 499-510, Plenum Press, New York **(1989)**.
7. Mechanism of Photoinhibition in vivo; I. Ohad, **N. Adir**, H. Koike, D.J. Kyle and Y. Inoue; *Journal of Biological Chemistry* 265, 1972-1979 **(1990)**.
8. Photoinhibition of the PSII and Degradation of the D1 Protein are Reduced in a Cytochrome b6/f-less Mutant of *Chlamydomonas reinhardtii*; S. Shochat, **N. Adir**, A. Gal, Y. Inoue, L. Metz, and I. Ohad; *Z. Naturforsch.* 45c, 395-401 **(1990)**.
9. Light Dependent D1 Protein Synthesis and Translocation is regulated by Reaction Center II; **N. Adir**, S. Shochat and I. Ohad; *Journal of Biological Chemistry.* 265, 12563-12568 **(1990)**.
10. The D1 (Q_B) Protein of Photosystem II: Interactions with its Surroundings and Role in Photoinhibition (in Hebrew). **N. Adir**; Supervisor: Professor I. Ohad **(1990)**.
11. Mechanism of the Light Dependent Turnover of the D1 Protein: **N. Adir**, S. Shochat, Y. Inoue and I. Ohad; in: *Current Research in Photosynthesis*, (M. Baltscheffsky, ed.) Vol II. pp. 409-414, Kluwer Academic Publishers, The Netherlands **(1990)**.
12. Dynamics of photosystem II: protein turnover, photoinhibition and regulation of energy transfer. **Adir, N.**; Gong, H.; Gal, A.; Shiloh,

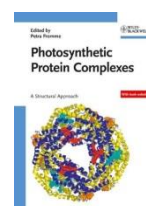

- Y.; Eisenberg, Y.; Topf, J.; Ohad, I. In: Colloq. INRA, 59, 155-8. **(1991)**.
13. Dynamics of Photosystem II: Mechanism of Photoinhibition and Recovery Processes. O. Prasil, **N. Adir** and I. Ohad. In: *The Photosystems: Structure, Function and Molecular Biology*, (J. Barber ed.), Elsevier Science Publishers, B.V., Amsterdam, pp.295-348 **(1992)**.
 14. Crystallization of the PSII-Reaction Center; **N. Adir**, M.Y. Okamura and G. Feher; in: *Research in Photosynthesis*, (N. Murata, ed.) Vol. II, pp. 5.195-5.198, Kluwer Academic Publishers, The Netherlands **(1992)**.
 15. The water-oxidizing site of higher plants studied by EPR and ENDOR techniques. R. Fiege, W. Zwegart, K.-D. Irrgang, J. Messinger, **N. Adir**, G. Renger and W. Lubitz; *Journal of Inorganic Biochemistry* 59, 335 **(1995)**.
 16. EPR/ENDOR studies of the water oxidizing complex in Photosystem II. R. Fiege, W. Zwegart, K.-D. Irrgang, **N. Adir**, B. Geiken, G. Renger and W. Lubitz; in "*Photosynthesis: from Light to Biosphere*", (P. Mathis, ed.), Kluwer Academic Publishers, Dordrecht, Vol. II, pp. 369-372 **(1995)**.
 17. EPR, ENDOR and ESEEM investigation of the electron acceptor radical anion Q_A^- in Photosystem II (PSII) reaction centers. F. MacMillan, J. Kurreck, **N. Adir**, F. Lenzian, H. Kass, F. Reifarth, G. Renger and W. Lubitz; in "*Photosynthesis: from Light to Biosphere*", (P. Mathis, ed.), Kluwer Academic Publishers, Dordrecht, Vol. I, pp. 659-662 **(1995)**.
 18. Crystallization and Characterization of the Photosynthetic Reaction Center-Cytochrome c2 complex from Rhodobacter sphaeroides. **N. Adir**, H.L. Axelrod, P. Beroza, R.A. Isaacson, S.H. Rongey, M.Y. Okamura and G. Feher; *Biochemistry* 35, 2535-2547 **(1996)**.
 19. EPR/ENDOR studies of the water oxidizing complex in Photosystem II. R. Fiege, W. Zwegart, K.-D. Irrgang, **N. Adir**, B. Geiken, G. Renger and W. Lubitz; *Photosynthesis Research* 48, 227-237 **(1996)**.
 20. Crystallization of the oxygen-evolving reaction center of Photosystem II in nine different detergent mixtures. **N. Adir**, *Acta Crystallographica D55*, 891-894 **(1999)**.
 21. Mutations Uncouple Human FGF-7 Biological Activity and Receptor Binding and Support Broad Specificity in the Secondary Receptor Binding Site of FGFs. I. Sher, A. Weizman, S. Lubinsky-Mink, T. Lang, **N. Adir**, D. Schomburg and D. Ron, *Journal of Biological Chemistry* 274, 35016-35022 **(1999)**.
 22. Progress in the crystallization of Photosystem II Components. **N. Adir**, R. Anati, V. Cheredman and N. Lerner; in *The Chloroplast: From Molecular Biology to Biotechnology* (J. H. Argyroudi-Akoyunoglou, and H. Senger eds.), Kluwer Academic Publishers, Dordrecht, pp. 35-40 **(1999)**.
 23. Crystallization of the reaction center of Photosystem II. **N. Adir**; in *Photosynthesis: Mechanism and Effects* (G. Garab ed.), Kluwer Academic Publishers, Dordrecht, Vol. II, pp. 945-948 **(1999)**.

24. Identification of residues important both for primary receptor binding and specificity in fibroblast growth factor-7. I. Sher, T. Lang, S. Lubinsky-Mink, J. Kuhn, **N. Adir**, S. Chatterjee, D. Schomberg, and D. Ron. *Journal of Biological Chemistry* 275, 34881-34886 **(2000)**.
25. Crystallization of dimers of the Manganese-Stabilizing Protein of Photosystem II. R. Anati and **N. Adir** *Photosynthesis Research* 64, 167-177 **(2000)**.
26. Analysis of the role of detergent mixtures on the crystallization of the reaction center of Photosystem II. V. Rukhman, N. Lerner and **N. Adir** *Photosynthesis Research* 65, 249-259 **(2000)**.
27. Crystal Structures of KDOP Synthase in its binary complexes with the substrate PEP and with a Mechanism-Based Inhibitor. O. Asojo, J. Friedman, **N. Adir**, V. Belakhov, Y. Shoham, and T. Baasov. *Biochemistry* 40, 6326-6334 **(2001)**.
28. Structure of C-phycoyanin from *Synechococcus vulcanus* at 2.5Å: structural implications for thermal stability in phycobilisome assembly. **N. Adir**, E. Dobrovetski and N. Lerner. *Journal of Molecular Biology* 313, 71-82 **(2001)**.
29. Tomato SP interacting proteins define a conserved signaling system that regulates shoot architecture and flowering. L. Pnueli, T. Gutfinger, D. Hareven, O. Ben-Naim, N. Ron, **N. Adir** and E. Lifschitz, *The Plant Cell* 13, 2687-2702 **(2001)**.
30. Preliminary X-ray crystallographic analysis of MntC, a periplasmic manganese binding component of a Mn transporter from *Synechocystis* sp. PCC 6803 R. Anati, M. Bhattacharyya-Pakrasi, H.B. Pakrasi and **N. Adir**. Proceedings of the 12th International Congress of Photosynthesis, Brisbane Australia **(2001)**.
31. Isolation and Preliminary X-ray Characterization of Cpn60-2 (65 kDa Heat Shock Protein) from *Mycobacterium tuberculosis*. **N. Adir**, E. Dobrovetsky, I. Shafat, C. Cohen and Y. Kashi. *Acta Crystallographica* D58 174-175 **(2002)**.
32. Preliminary X-ray crystallographic analysis of a soluble form of MntC, a periplasmic manganese binding component of an ABC-type Mn transporter from *Synechocystis* sp. PCC 6803. **N. Adir**, V. Rukhman, B. Brumshtein, and R. Anati. *Acta Crystallographica* D58, 176-178 **(2002)**.
33. Refined structure of c-phycoyanin from the cyanobacterium *Synechococcus vulcanus* at 1.6 Å: Insights into the role of solvent molecules in thermal stability and co-factor structure. **N. Adir**, R. Vainer and N. Lerner. *Biochimica et Biophysica Acta* 1556, 168-174 **(2002)**.
34. The ribonuclease H activity of the reverse transcriptases of human immunodeficiency viruses type 1 and type 2 is modulated by residue 294 of the small subunit. Z. Sevilya, S. Loya, **N. Adir** and A. Hizi, *Nucleic Acid Research* 31, 1481-1487 **(2003)**.
35. Mutagenesis of Cysteine 280 of the Reverse Transcriptase of Human Immunodeficiency Virus Type-1: The Effects on the Ribonuclease H activity. Z. Sevilya, S. Loya, A. Duvshani, **N. Adir** and A. Hizi. *Journal of Molecular Biology* 327, 19-30 **(2003)**.

36. The crystal structure of a novel unmethylated form of C-phycocyanin, a possible connector between cores and rods in phycobilisomes. **N. Adir** and N. Lerner, *Journal of Biological Chemistry* 278, 25926-25932 (2003).
37. A Web-based Chemistry Course as a Means to Foster Freshman Learning. Y.J. Dori, M. Barak and **N. Adir**, *Journal of Chemical Education* 80, 1084-1092 (2003).
38. RNA degradation, polymerization and binding properties of the different domains of polynucleotide phosphorylase from spinach chloroplasts. S. Yehudai-Resheff, V. Portnoy, S. Yogev, **N. Adir** and G. Schuster, *The Plant Cell* 15, 2003-2019 (2003).
39. Structure-based Mutational Analysis Identify Receptor Binding Specificity Determinants in FGF7, I. Sher, M. Mohammadi, **N. Adir** and D. Ron, *FEBS Letters* 552, 150-154 (2003).
40. Photoinhibition – A Historical Perspective. **N. Adir**, H. Zer, S. Shochat and I. Ohad. In: Celebrating the Historical Highlights in Photosynthesis Research (Govindjee and H. Gest eds.) *Photosynthesis Research* 76, 343-370 (2003).
Also in: Discoveries in Photosynthesis Series: [Advances in Photosynthesis and Respiration](#), Vol. 20 (Govindjee; Beatty, J.T.; Gest, H.; Allen, J.F., Eds.) pp. 931-958, Springer Heidelberg (2005).
41. Transcriptional regulation of meiosis in budding yeast. Kassir, Y., Adir, N., Boger-Nadjar, E., Guttmann Raviv, N., Rubin-Bejerano, I., Sagee, S. and Shenhar, G., In: International Review on Cytology, A Survey of Cell Biology, (K.W. Jeon, ed.) Academic Press 224, 111-171 (2003).
42. The proteasome and the delicate balance between destruction and rescue. M.H. Glickman and **N. Adir**, *PLoS Biology*, 2, 25-27 (2004).
43. Mapping Glycoside Hydrolases Substrate Subsites by Isothermal Titration Calorimetry. G. Zolotnitsky, U. Cogan, **N. Adir**, V. Solomon, G. Shoham and Y. Shoham, *Proceedings of the National Academy of Sciences, USA* 101, 11275-11280 (2004).
44. A Reciprocal Single Mutation Affects the Metal Requirement of KDO8P Synthases from *Aquifex pyrophilus* and *Escherichia coli*. S. Shulami, C. Furdui, **N. Adir**, Y. Shoham, K. S. Anderson and Timor Baasov, *Journal of Biological Chemistry* 279, 45110-45120 (2004).
45. The MntC crystal structure suggests that import of Mn²⁺ in cyanobacteria is redox controlled. V. Rukhman, R. Anati, M. Melamed-Frank and **N. Adir**, *Journal of Molecular Biology* 348, 961-969 (2005).
46. Crystal structures of *Escherichia coli* KDO8P synthase complexes reveal the source of catalytic irreversibility. R. Vainer, V. Belakhov, E. Rabkin, T. Baasov and **N. Adir**, *Journal of Molecular Biology* 351, 641-652 (2005).
47. Cloning and characterization of the *Schizosaccharomyces pombe* homologues of the human protein Translin and the Translin-associated protein TRAX. O. Laufman, R. Ben Yosef, **N. Adir** and H. Manor, *Nucleic Acid Research* 33, 4128-4139 (2005).

48. Elucidation of the molecular structures of components of the phycobilisome: Reconstructing a giant. **N. Adir** *Photosynthesis Research* 85, 15-32 (2005).
49. Purification and functional analysis of a novel protein extracted from the shells of *Strombus decorus persicus*. B. Pokroy, E. Zolotoyabko, and **N. Adir**, *Biomacromolecules* 7, 550-556 (2006).
50. Anisotropic lattice distortions in biogenic calcite induced by intracrystalline organic molecules. B. Pokroy, A.N. Fitch, F. Marin, M. Kapon, **N. Adir** and E. Zolotoyabko, *Journal of Structural Biology* 155, 96-103 (2006).
51. Two newly identified membrane-associated and plastidic tomato HXKs: characteristics, predicted structure and intracellular localization. M. Kandel-Kfir, H. Damari-Weissler, M. A. German, D. Gidoni, A. Mett, E. Belausov, M. Petreikov, **N. Adir** and D. Granot, *Planta* 224, 1341-1352 (2006).
52. Assembly and Disassembly of Phycobilisomes. **N. Adir**, M. Dines, M. Klartag, A. McGregor and M. Melamed-Frank, in *Complex Intracellular Structures in Prokaryotes*, Microbiology Monographs Vol. 2 (J. Shively, ed.), pp. 47-77, Springer-Verlag, Berlin (2006).
53. Crystallization of sparingly soluble stress-related proteins from cyanobacteria by controlled urea solubilization. M. Dines, E. Sendersky, R. Schwarz, and **N. Adir**, *Journal of Structural Biology* 158, 116-121 (2007).
54. Protein-induced, previously unidentified twin form of calcite. B. Pokroy, M. Kapon, F. Marin, **N. Adir** and E. Zolotoyabko, *Proceedings of the National Academy of Sciences, USA* 104, 7337-7341 (2007).
55. Viral photosynthetic reaction center genes and transcripts in the marine environment. I. Sharon, S. Tzahor, S. Williamson, M. Shmoish, D. Man-Aharonovich, D.B. Rusch, S. Yooseph, G. Zeidner, S. S. Golden, S. R. Mackey, **N. Adir**, U. Weingart, D. Horn, J. C. Venter, Y. Mandel-Gutfreund and O. Béjà. *ISME Journal* 1, 492-501 (2007).
56. Crystal Structures of the NblA protein. M. Dines, R. Schwarz and **N. Adir**; Proceedings of the 14th International Congress of Photosynthesis, Glasgow UK. Vol. I, pp. 235-242 (2007).
57. Investigating the Effect of Crystallization Conditions on the Conformation of Individual Amino Acid Side Chains in Phycocyanin Crystals Structures. A. McGregor, L. David and **N. Adir**; Proceedings of the 14th International Congress of Photosynthesis, Glasgow UK. Vol. I, pp. 295-298 (2007).
58. Normophosphatemic Familial Tumoral Calcinosis Is Caused by Deleterious Mutations in SAMD9, Encoding a TNF-alpha Responsive Protein. I. Chefetz, D. Ben Amitai, S. Browning, K. Skorecki, **N. Adir**, M.G. Thomas, L. Kogleck, O. Topaz, M. Indelman, J. Uitto, G. Richard, N. Bradman, E. Sprecher. *Journal of Investigative Dermatology* 128, 1423-1429 (2008).
59. Alopecia, Neurological Defects, and Endocrinopathy Syndrome Caused by Decreased Expression of RBM28, a Nucleolar Protein Associated with Ribosome Biogenesis. J. Nousbeck, R. Spiegel, A.

- Ishida-Yamamoto, M. Indelman, A. Shani-Adir, **N. Adir**, E. Lipkin, S. Bercovici, D. Geiger, M.A. van Steensel, P.M. Steijlen, R. Bergman, A. Bindereif, M. Choder, S. Shalev and E. Sprecher. *American Journal of Human Genetics* 82, 1114-1121 (2008).
60. Mutagenesis of Gln294 of the reverse transcriptase of human immunodeficiency virus type-2 and its effects on the ribonuclease H activity. R. Bochner, A. Duvshani, **N. Adir**, A. Hizi, *FEBS Letters* 582, 2799-2805 (2008).
61. Structural, functional and mutational analysis of the NblA protein provides insight into possible modes of interaction with the phycobilisome. M. Dines, E. Sendersky, L. David, R. Schwarz*, and **N. Adir*** (* corresponding authors), *Journal of Biological Chemistry* 283, 30330-30340 (2008).
62. Allophycocyanin trimer stability and functionality is primarily due to polar enhanced hydrophobicity of the phycocyanobilin binding pocket. A. McGregor, M. Klartag, L. David and **N. Adir**, *Journal of Molecular Biology* 384, 406-421 (2008).
63. Structure of the Phycobilisome Antennae in Cyanobacteria and Red Algae. **N. Adir** in "Photosynthetic Protein Complexes: A Structural Approach" (ed. Fromme, P.) pp. 243-274 WILEY-VCH Verlag GmbH & Co. KGaA, Weinheim (2008).
(Book Cover illustration).
64. Myotonia congenita in a large consanguineous arab family: insight into the clinical spectrum of carriers and double heterozygotes of a novel mutation in the chloride channel *clcn1* gene. A. Shalata, H. Furman, V. Adir, **N. Adir**, Y. Hujeirat, S. A. Shalev and Zvi U. Borochowitz, *Muscle and Nerve* 41, 464-9 (2010).
65. Engineering of an alternative electron transfer path in Photosystem II. S. Larom, F. Salama, G. Schuster and **N. Adir**, *Proceedings of the National Academy of Science, USA* 107, 9650-9655 (2010).
66. Crystallization and preliminary x-ray crystallographic analysis of a bacterial tyrosinase from *Bacillus megaterium*. M. Sendovski, M. Kanteev, V. Shuster, N. Adir and A. Fishman. *Acta Crystallographica F*. 66, 1101-3 (2010).
67. High Resolution crystal structures of trimeric and rod Phycocyanin. L. David, A. Marx and N. Adir. *Journal of Molecular Biology* 405, 201-213 (2011).
68. First structures of an active bacterial tyrosinase reveal copper plasticity. M. Sendovski, M. Kanteev, V. Shuster Ben-Yosef, **N. Adir**, A. Fishman. *Journal of Molecular Biology* 405, 227-237 (2011).
69. The dimeric structure of the Cpn60.2 chaperonin of *Mycobacterium tuberculosis* at 2.8Å reveals possible modes of function A. Shahar, M. Melamed-Frank, Y. Kashi, L. Shimon and **N. Adir**. *Journal of Molecular Biology*, 412, 192-203 (2011).
70. Manganese in Biological systems: transport and function. E. Salomon, M. Kanteev, **N. Adir** and N. Keren. in: *The Chemistry of Organomanganese Compounds*. (Editors: Zvi Rappoport and Ilan Marek) pp. 289-304. John Wiley and Sons, Chichester. (2011).

71. Isolation of intact phycobilisomes in low salt: a novel method for purifying phycobilisomes by mild cross-linking. L. David and **N. Adir**. C.Lu (Ed.) *Photosynthesis: Research for Food, Fuel and Future -15th International Conference on Photosynthesis, Symposium 04*, pp. 133-147, Zhejiang University Press, Springer-Verlag GmbH. (2012).
72. Changes in tyrosinase specificity by ionic liquids and sodium dodecyl sulfate. M. Goldfeder, M. Egozy, V. Shuster Ben-Yosef, **N. Adir** and A. Fishman. *Appl Microbiol Biotechnol.* 97, 1953-61 (2013).
73. Allophycocyanin and Phycocyanin crystal structures reveal facets of Phycobilisome assembly. *Biochimica et Biophysica Acta – Bioenergetics*. A. Marx and **N. Adir**. 1827, 311-318 (2013).
74. Arginine 116 structurally and functionally anchors the MntC protein active site outer shell. M. Kanteev and **N. Adir** *Acta Crystallographica F*. F69, 237-242 (2013).
75. Influencing the monophenolase/diphenolase activity ratio in tyrosinase. M. Goldfeder, M. Kanteev, **N. Adir** and A. Fishman. *Biochimica et Biophysica Acta – Proteins and Proteomics* 1834, 629-633 (2013).
76. The mechanism of copper uptake by tyrosinase from *Bacillus megaterium*. M. Kanteev, M. Goldfeder, M. Chojnacki, **N. Adir** and A. Fishman. *Journal of Biological Inorganic Chemistry*. 18(8): 895-903 (2013).
77. Structural and functional differences between pheromotropic and melanotropic PK/PBAN receptors. A. Hariton Shalev, M. Shalev, **N. Adir**, E. Belausov and M. Altstein. *Biochimica et Biophysica Acta – General Subjects*, 1830, 5036-5048 (2013).
78. Identification of the molecular attributes required for aminoglycoside activity against *Leishmania*. M. Shalev, J. Kondo, D. Kopelyanskiy, C.L. Jaffe, **N. Adir*** and T. Baasov* (*corresponding authors). *Proceedings of the National Academy of Science, USA* 110(33):13333-13338 (2013).
79. Cole disease results from mutations in *ENPP1*. O. Eytan, F. Morice-Picard, O. Sarig, K. Ezzedine, O. Isakov, Q. Li, A. Ishida-Yamamoto, N. Shomron, T. Goldsmith, D. Fuchs-Telem, **N. Adir**, J. Uitto, S. J. Orlow, A. Taieb and E. Sprecher. *American Journal of Human Genetics*, 93(4):752-757 (2013).
80. Structural studies show energy transfer within stabilized Phycobilisomes independent of the mode of rod-core assembly. L. David, M. Prado, A. A. Arteni, D.A. Elmlund, R. E. Blankenship and **N. Adir**. *Biochimica et Biophysica Acta – Bioenergetics*. 1837(3):385-389 (2014).
81. Activation and Deactivation of Vibronic Channel in Intact Phycocyanin Rod. C. Nganou, L. David, R. Meinke, **N. Adir**, J. Maultzsch, M. Mkandawire, D. Pouhè and C. Thomsen. *Journal of Chemical Physics*, 140(8):85101. (2014).
82. Olmsted syndrome caused by a homozygous recessive mutation in *TRPV3* O. Eytan, D. Fuchs-Telem, B. Mevorach, M. Indelman, R. Bergman, O. Sarig, I. Goldberg, **N. Adir** and E. Sprecher. *Journal of Investigative Dermatology*, 134(6):1752-1754 (2014).
83. Room temperature biological quantum random walk in phycocyanin nanowires. I. Eisenberg, S. Yochelis, R. Ben-Harosh, L. David, A. Faust, N. Even-Dar, H. Taha, N.M. Haegel, **N. Adir**, N. Keren and Y. Paltiel. *Physical*

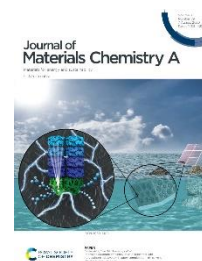

- Chemistry Chemical Physics*, 16(23): 11196-11201 (2014). **(Cover illustration)**.
84. The *Entamoeba histolytica* Dnmt2 homolog (Ehmeth) confers resistance to nitrosative stress. R. Hertz, A. Tovy, M. Kirschenbaum, M. Geffen, T. Nozaki, **N. Adir** and S. Ankri. *Eukaryotic Cell*, 13(4): 494-503 (2014).
 85. Structural characteristics that stabilize or destabilize different assembly levels of Phycocyanin by urea. A. Marx and **N. Adir**. *Photosynthesis Research* 121(1): 87-93 (2014).
 86. Determination of tyrosinase substrate binding modes reveals mechanistic differences between type-3 copper proteins. M. Goldfeder, M. Kanteev, S. Isaschar-Ovdat, **N. Adir*** and A. Fishman*. *Nature Communications*, 5, 4505 (2014). (*corresponding authors).
 87. Investigation of Phycobilisome subunit interaction interfaces by coupled cross-linking and mass spectrometry. O. Tal, B. Trabelcy, Y. Gerchman, and **N. Adir**. *Journal of Biological Chemistry* 289:33084-33097 (2014).
 88. Piecing Together the Phycobilisome. A. Marx, L. David and N. Adir. *in: The Structural Basis of Biological Energy Generation. Advances in Photosynthesis and Respiration Series* (Editors: Martin Hohmann-Marriot and Thomas D. Sharkey). Volume 39. Springer, Dordrecht pp. 59-76 (2014).
 89. Evidence pointing to more excitation energy transfer pathways in the phycobiliprotein antenna system of *Acaryochloris marina*. C. Nganou, L. David, **N. Adir**, M.J. Deen and M. Mkandawire. *Photochemical and Photobiological Sciences*, 14:429-438 (2015).
 90. The Photosystem II D1-K238E mutation enhances electrical current production using cyanobacterial thylakoid membranes in a bio-photoelectrochemical cell. S. Larom, D. Kallmann, G. Saper, R. Pinhassi, A. Rothschild, H. Dotan, G. Ankonina, G. Schuster* and **N. Adir***. 126, 161-169 *Photosynthesis Research* (2015). (*corresponding authors).
 91. Photosynthetic membranes of *Synechocystis* or plants convert sunlight to photocurrent through different pathways due to different architectures. R.I. Pinhassi, D. Kallmann, G. Saper, S. Larom, A. Linkov, A. Boulouis, M-A. Schöttler, R. Bock, A. Rothschild, **N. Adir*** and G. Schuster*. *PLoS One* 10, e0122616 (2015). (*corresponding authors).
 92. Crystal structure of the bovine COPI Delta subunit MHD domain at 2.15Å resolution. A. Lahav, H. Rozenberg, A. Parnis, D. Cassel* and **N. Adir*** *Acta Crystallographica D* 71, 1328-1334 (2015) (*corresponding authors).
 93. Structural Basis for Selective Targeting of Leishmanial Ribosomes: Aminoglycoside Derivatives as Promising Therapeutics. M. Shalev, H. Rozenberg, B. Smolkin, A. Nasereddin, D. Kopelyanskiy, V. Belakhov, T. Schrepfer, J. Schacht, C.L. Jaffe, **N. Adir** and T. Baasov. *Nucleic Acid Research* 43(17):8601-13 (2015).
 94. A crystal structure of 2-hydroxybiphenyl 3-monooxygenase with bound substrate provides insights into the enzymatic mechanism M. Kanteev; A. Bregman-Cohen; B. Deri; A. Shahar; **N. Adir** and A.

- Fishman. *Biochimica et Biophysica Acta – Proteins and Proteomics* 1854(12):1906-1913 **(2015)**.
95. Linker Proteins Enable Ultrafast Excitation Energy Transfer in the Phycobilisome Antenna System of *Thermosynechococcus vulcanus*. C. Nganou, L. David, **N. Adir**, M. Mkandawire *Photochemical & Photobiological Sciences* 15(1), 31-44 **(2016)**.
 96. The Orange Carotenoid Protein burrows into the Phycobilisome to provide photoprotection. D. Harris, O. Tal, D. Jallet, A. Wilson, D. Kirilovsky and **N. Adir**. *Proceedings of the National Academy of Sciences, USA* 113(12), E1655-1662 **(2016)**.
 97. The amino acid sequence repertoire of the bacterial proteome and the occurrence of untranslatable sequences. S. Penias Navon, G. Kornberg, J. Chen, T. Schwartzman, A. Tsai, E.V. Puglisi, J.D. Puglisi* and **N. Adir***. 113(26), 7166-7170. *Proceedings of the National Academy of Sciences, USA* **(2016)**. (*corresponding authors).
 98. Hybrid Bio-Photo-Electro-Chemical Cells for Solar Water Splitting. R. I. Pinhassi, D. Kallmann, G. Saper, H. Dotan, A. Linkov, A. Kay, V. Livneau, G. Schuster, **N. Adir**, and A. Rothschild. *Nature Communications* 7, 12552 **(2016)**.
 99. A new form of ectodermal dysplasia caused by mutations in *TSPEAR*. Peled, O. Sarig, L. Samuelov, M. Bertolini, L. Ziv, D. Weissglass, M. Eskin-Schwartz, C. Adase, N. Malchin, R. Bochner, G. Fainberg, I. Goldberg, K. Sugawara, A. Baniel, D. Tsuruta, C. Luxemburg, **N. Adir**, S. Shalev, R. Gallo, N. Shomron, R. Paus, E. Sprecher. *PLoS Genetics* 12, e1006369 **(2016)**.
 100. The unravelling of the complex pattern of tyrosinase inhibition. B. Deri, M. Kanteeva, M. Goldfeder, D. Lecina, V. Guallarb, **N. Adir**, and A. Fishman. *Scientific Reports* 6, 34993 **(2016)**.
 101. Calpain 12 function revealed through the study of an atypical case of autosomal recessive congenital ichthyosis. R. Bochner, L. Samuelov, O. Sarig, Q. Li, C.A. Adase, O. Isakov, N. Malkin, D. Vodo, R. Shayevitch, A. Peled, B.D. Yu, G. Fainberg, E. Warshauer, **N. Adir**, N. Erez, A. Gat, Y. Gottlieb, T. Rogers, M. Pavlovsky, I. Goldberg, N. Shomron, A. Sandilands, L. Campbell, S. MacCallum, W.H.I. McLean, G. Ast, R. Gallo, J. Uitto and E. Sprecher. *Journal of Investigative Dermatology* 137, 385-393 **(2017)**.
 102. Regulating the energy flow direction in a cyanobacterial light harvesting antenna complex. I. Eisenberg, F. Caycedo-Soler, D. Harris, S. Yochelis, S.F. Huelga, M.B. Plenio, **N. Adir**, N. Keren, and Y. Paltiel *Journal of Physical Chemistry B*, 121, 1240-1247 **(2017)**.
 103. Itzhak Ohad (1930-2016). **N. Adir**, S. Seifman-Shochat, N. Ohad, D. Ohad and N. Keren. *Photosynthesis Research*. 132, 107-109 **(2017)**.

104. Energy Transfer Kinetics in Photosynthesis as an Inspiration for Improving Organic Solar Cells. C. Nganou, G. Lackner, B. Teschome, M. J. Deen, **N. Adir**, D. Pouhe, D. C. Lupascu and M. Mkandawire. *ACS Applied Materials & Interfaces*. 9, 19030-19039 (2017).
105. Concentration Based Self-Assembly of Phycocyanin. I. Eisenberg, D. Harris, Y. Levi-Kalisman, S. Yochelis, A. Shemesh, G. Ben-Nissan, M. Sharon, U. Raviv, **N. Adir**, N. Keren and Y. Paltiel. *Photosynthesis Research* 134, 39-49 (2017).
106. Exome sequencing and network analysis identifies shared mechanisms underlying spinocerebellar ataxia. E.A.R. Nibbeling, A.Duarri, C.C. Verschuuren-Bemelmans, M.R. Fokkens, J.M. Karjalainen, C.J.L.M. Smeets, J.J. de Boer-Bergsma, G. van der Vries, D. Dooijes, G.B. Bampi, C. van Diemen, E. Brunt, E. Ippel, B. Kremer, M. Vlak, **N. Adir**, C. Wijmenga, B. P.C. van de Warrenburg, L. Franke, R.J. Sinke and D.S. Verbeek. *Brain* 140, 2860-2878 (2017).
107. Striate palmoplantar keratoderma resulting from a missense mutation in *DSG1*. D. Vodo, E. A. O'Toole, N. Malchin, A. Lahav, **N. Adir**, O. Sarig, K. Green, F. J.D. Smith, E. Sprecher. *British Journal of Dermatology*. 179(3):755-757 (2018).
108. Light Harvesting in cyanobacteria: The Phycobilisome L. Bar-Eyal, A. Shperberg-Avni, Y. Paltiel, N. Keren and **N. Adir**. In: *Light Harvesting in Photosynthesis* (editors: Roberta Croce, Rienk van Grondelle, Herbert van Amerongen and Ivo van Stokkum). *Foundation of Biochemistry and Biophysics series*, CRC Press (2018).
109. Structural heterogeneity leads to functional homogeneity in *A. marina* phycocyanin. S. Bar-Zvi, A. Lahav, D. Harris, D.M. Niedzwiedzki, R.E. Blankenship and **N. Adir**. *Biochimica et Biophysica Acta – Bioenergetics* 1859, 544-553 (2018).
110. The structural basis for the extraordinary energy-transfer capabilities of the Phycobilisome. D. Harris, S. Bar Zvi, A. Lahav, I. Goldshmid and **N. Adir**. In “*Membrane Protein Complexes: Structure and Function*”, *Subcellular Biochemistry Series* volume 87, pp. 57-82. Series editor: Harris, J.R. and Boekema, E., Springer Verlag, Singapore (2018).
111. Cryo-spectroscopy studies of intact light-harvesting antennas reveal empirical electronic energy transitions in two cyanobacteria species. C. Nganou, **N. Adir** and M. Mkandawire. *Journal of Physical Chemistry B*, 122, 3068-3078 (2018).
112. Live cyanobacteria produce photocurrent and hydrogen by functional coupling of the respiratory and photosynthetic systems G. Saper, D. Kallmann, F. Conzuelo, F. Zhao, T.N. Tóth, V. Liveanu, S. Meir, J. Szymanski, A. Aharoni, W. Schuhmann, A. Rothschild, G. Schuster* and **N. Adir***. *Nature Communications* 9, 2168 (2018). (*corresponding authors)
113. Structural studies reveal protein dynamics crucial for protein carotenoid uptake and delivery. D. Harris, A. Wilson, F.

- Muzzopappa, N.N. Sluchanko, T. Friedrich, E. G. Maksimov, D. Kirilovsky* and **N. Adir***. *Communications Biology (Nature)* 1, 125-136 **(2018)**. *Corresponding authors
114. Biophysical and structural characterization of the small heat shock protein HspA from *Thermosynechococcus vulcanus* in 2 M urea. S. Ghosh, F. Salama, M. Dines and **N. Adir**. *BBA Proteins and Proteomics* 1867, 442-452 **(2019)**.
115. Excitation energy migration pathways between multiple phycocyanin populations in *A. marina* phycobilisomes D.M. Niedzwiedzki, S. Bar-Zvi, R.E. Blankenship and **N. Adir**. *BBA Bioenergetics* 1860, 286-296 **(2019)**.
116. Variant *PADI3* in central centrifugal cicatricial alopecia. L. Malki, O. Sarig, M. T. Romano, M. C. Mechin, A. Peled, M. Pavloski, L. Samuelov, L. Uwakwe, V. Briskin, J. Mohamad, A. Gat, O. Isakov, T. Rabinowitz, N. Shomron, **N. Adir**, M. Simon, A. McMichael, N. C. Dlova, R. C. Betz and E. Sprecher. *New England Journal of Medicine* 380, 833-841 **(2019)**.
117. The Amazing Phycobilisome. **N. Adir**, S. Bar Zvi and D. Harris. Invited review for *BBA Bioenergetics*. 1861, 148047 **(2020)**.
118. Structural dynamics in the C terminal domain homolog of Orange Carotenoid Protein reveals residues critical for carotenoid uptake. D. Harris, F. Muzzopappa, F. Glaser, A. Wilson, D. Kirilovsky* and **N. Adir***. *BBA Bioenergetics* 1861, 148214. **(2020)**.

120. NADPH is the major endogenous electron mediator in cyanobacterial-driven bio-photoelectrochemical cells. Y. Shlosberg, B. Eichenbaum, T. N. Tóth, G. Levin, V. Liveanu, G. Schuster* and **N. Adir*** *iScience* 24(1) 101892 **(2021)**.
121. Palmoplantar keratoderma caused by a missense mutation in *CTSB* encoding cathepsin B. J. Mohamad, L. Samuelov, L. Malki, A. Peled, M. Pavlovsky, K. Malovitski, S. Taiber, **N. Adir**, T. Rabinowitz, N. Shomron, J. Milner, G. Lestringant, O. Sarig and E. Sprecher. *Clinical and Experimental Dermatology* 46, 103-108 **(2021)**.
122. A novel mutation in *MYCN* gene causing congenital absence of the flexor pollicis longus tendon as an unusual presentation of Feingold syndrome 1. A. Peleg, A. Kurolap, L. Sagi-Dain, G. Larom-Khan, V. Adir, A. Mory, T. Paperna, C. Gonzaga-Jauregui, A.R. Shuldiner, **N. Adir**, H. Baris Feldman and R. Wollstein. *Clinical Dysmorphology* 30, 71-75 **(2021)**.
123. The Phycobilisome. **N. Adir** *Encyclopedia of Biological Chemistry, 3rd Edition. Elsevier. Vol. 2 pp. 282-290 (2021)*.

124. Identification of clinically useful predictive genetic variants in pachyonychia congenita. L. Samuelov, O. Sarig, **N. Adir**, M. Pavlovsky, F. Smith, J. Schwartz, D. Hansen and E. Sprecher. *Clinical and Experimental Dermatology* doi: 46, 867-873 (2021).
125. Rare functional missense variants in CACNA1H: What can we learn from Writer's cramp? M. Huang, E.A.R. Nibbeling, T.J. Lagrand I.A. Souza, M.A. Gandini, F.-X. Zhang, J. Koelman, **N. Adir**, R.J. Sinke, G.W. Zamponi, M. Tijssen, and D. Verbeek. *Molecular Brain* 14, 1-4 (2021).
126. The desert green algae *Chlorella ohadii* thrives at excessive high light intensities by exceptionally enhancing the mechanisms that protect photosynthesis from photoinhibition. G. Levin, S. Kulikovskiy, V. Liveanu, B. Eichenbaum, A. Meir, Y. Tadmor, **N. Adir**, and G. Schuster. *The Plant Journal* 106, 1260-1277 (2021).
127. Functionalized gold nanoparticles enhance Photosystem II driven photocurrent in a hybrid nano-bio-photoelectrochemical cell. H. Shoyhet, N.G. Pavlopoulos, L. Amirav* and **N. Adir***. *Journal of Materials Chemistry A* 9, 17231-17241 (2021).
128. Electron mediation and photocurrent enhancement in *Dunallia salina* driven bio-photo electrochemical cells. Y. Shlosberg, T.N. Tóth, B. Eichenbaum, L. Keysar, G. Schuster and **N. Adir***. *Catalysts* 11, 1220 (2021).
129. Bioelectricity generation from live marine photosynthetic macroalgae. Y. Shlosberg, N. Krupnik, T.N. Tóth, B. Eichenbaum, M. Meirovich, D. Meiri, O. Yehezkeli, G. Schuster, A. Israel* and **N. Adir***. *Biosensors and Bioelectronics* 198, 113824 (2022).
130. Who's your neighbour? Suggesting alternative assemblies of E/F type bilin lyases from crystal lattice analysis. M. Suissa-Szlej, J. Sklyar and **N. Adir**. *Structure (Perspective)*, 30, 534-536 (2022).
131. Harnessing photosynthesis to produce electricity using cyanobacteria, green algae, seaweeds, and plants. Y. Shlosberg, G. Schuster and **N. Adir**. *Frontiers in Plant Science (review)* 13, 955843 2603 (2022).
132. Harvesting electrical current from intact plant leaves Y. Shlosberg, M. Meirovich, O. Yehezkeli, G. Schuster and **N. Adir***. *Biosensors and Bioelectronics* 215, 114558 (2022).
133. Autosomal recessive congenital ichthyosis caused by a pathogenic missense variant in CLDN1. J. Mohamad, L. Samuelov, S. Assaf, L. Malki, K. Malovitsky, **N. Adir**, E. Granot, M. Pavlovsky, O. Sarig, and E. Sprecher. *American Journal of Medical Genetics Part A* 188, 2879-2887 (2022).
134. Heterozygous variants in ITGB4 cause autosomal dominant nail dystrophy. K. Malovitski, O. Meijers, E. Cohen-Barak, J. Bergman, **N. Adir**, M. Giladi, S. Shalev, O. Sarig, J. Schwartz, H. Evans, E. Sprecher and L. Samuelov. *British Journal of Dermatology* 187, 826-828 (2022).

135. *Trichoderma erythraeum* produces a higher photocurrent than other cyanobacterial species in bio-photo electrochemical cells. Y. Shlosberg, D. Spungin, G. Schuster, I. Berman-Frank and **N. Adir**. *BBA-Bioenergetics* 1863, 148910 (**2022**).
136. The Other Dimension - Tuning Hole Extraction via Nanorod Width. T. Rosner, N.G. Pavlopoulos, H. Shoyhet, M. Micheel, M. Wächtler*, N. Adir^{1*} and L. Amirav*. *Nanomaterials* 12, 3343 (**2022**).
137. A self-enclosed bio-photoelectrochemical cell in succulent plants. Y. Shlosberg, G. Schuster and **N. Adir**. *ACS Applied Materials and Interfaces* 14, 53761-53766 (**2022**).
138. Mass spectrometry and spectroscopic characterization of a tetrameric photosystem I supercomplex from *Leptolyngbya ohadii*, a desiccation-tolerant cyanobacterium. D. Niedzwiedzki; N. C. M. Magdaong; X. Su; **N. Adir**; N. Keren and H. Liu. *BBA Bioenergetics* 1864, 148955 (**2023**).
139. Switching of photocurrent polarity in electrochemical cells with light via an excited state proton transfer mechanism. A. Yuchnovsky, Y. Shlosberg, **N. Adir** and N. Amdursky. *Angewandte Chemie* 135 (28) e202301541 (**2023**).
140. A desert green alga that thrives at extreme high-light intensities using a unique photoinhibition protection mechanism G. Levin, M. Yasmin, V. Liveanu, C. Burstein, O. Kleifeld, M. C. Simanowitz, A. Meir, Y. Tadmor, J. Hirschberg, **N. Adir** and G. Schuster. *The Plant Journal* 115, 510-528 (**2023**).
141. Photosynthetic fuel cells: just an interesting concept or a promise for future technology? Y. Shlosberg*, G. Schuster and **N. Adir**. *Bioelectricity (perspective)*. *Bioelectricity* 5, 132-138 (**2023**).
142. The structural basis for light acclimation in phycobilisome light harvesting systems. E.J. Dodson, J. Ma, M. Suissa Szlejf, Y. Paltiel, **N. Adir**, S. Sun, S.-F. Sui and N. Keren. *Accepted* (**2023**).
143. A bioengineered SP1-hemin biohybrid mimics the activity of peroxidase with improved characteristics. Y. Zeibaq, O. Bachar, J. Sklyar, **N. Adir** and O. Yehezkeli. *Submitted* (**2023**).
144. Lethal Sequences: Development of a platform for antimicrobial compounds based on under-represented sequences in pathogenic organisms. T. Tarabeh, N. Yehuda, R. Shapira, R. Hijazi, A. Lahav, D. Matzov, M. Shalev Ben-Ami, S. Yaron and **N. Adir**. *In preparation* (**2023**).
